

IRAN

**Name:** Amir Azizi

**Program:** Master of Business Administration, International (Degree)

The MBA program at Malaspina University-College had been one of the most dynamic and enjoyable periods of my life. I learned an incredible amount of material and skills, but also learned about myself and came into my own. Moreover, the School's environment allows and encourages me not only to work with my classmates, but to fully enjoy and discover those who will be my lifelong friends from all over the world. In the small size classes, the professors seem genuinely interested in students. The course nicely balances theory with practice, and covers the most important topics of the business and management. This one year MBA program was an exciting, challenging and exhilarating program for me.

I believe Malaspina University-College has a very friendly, supportive and experienced faculties and staff. As an international student, I felt Malaspina University-College as my home. I was working as a student advisor in the student housing and as a technical assistance at the library. I felt a unique organizational culture, with a spirit of friendship.

Nanaimo has beautiful scenery with a combination of lakes, ocean, mountains and trees. It is a clean, quite and safe city. So, it makes Nanaimo a peaceful place, which offers the best place to study.

I think learning is something that goes on throughout our life and the ability to go back and do an MBA after our undergraduate degree and years of working is fantastic.
